GET Get Available Plants

```
http://localhost:8080/api/sales/plants?name=plant&startDate=2020-01-01&endDate=2020-12-01
```

PARAMS

name

plant

startDate

2020-01-01

endDate

2020-12-01

Example Request

Get Available Plants

```
curl --location --request GET 'http://localhost:8080/api/sales/plants?name=plant&startDate=2020-01-01&endDate=2020-12-01'
```

GET Get Purchase Order

```
http://localhost:8080/api/sales/orders/:id
```

PATH VARIABLES

id

1

Example Request

Get Purchase Order

```
curl --location --request GET 'http://localhost:8080/api/sales/orders/1'
```

Maintenance

GET Get Plan

```
http://localhost:8080/api/maintenance/plan/:id
```

PATH VARIABLES

id

1

Example Request

Get Plan

```
curl --location --request GET 'http://localhost:8080/api/maintenance/plan/1'
```

GET Get Tasks

```
http://localhost:8080/api/maintenance/task
```

Example Request

Get Tasks

```
curl --location --request GET 'http://localhost:8080/api/maintenance/task'
```

GET Get Task

http://localhost:8080/api/maintenance/plan/task/:id

PATH VARIABLES

id

1

Example Request

Get Task

```
curl --location --request GET 'http://localhost:8080/api/maintenance/plan/task/1'
```

POST Create Plan

http://localhost:8080/api/maintenance/plan

HEADERS

Content-Type

application/json

BODY raw

```
{
  "yearOfAction": 2012,
  "plant": {"_id": 1}
}
```

Example Request

Create Plan

```
curl --location --request POST 'http://localhost:8080/api/maintenance/plan' --header 'Content-Type: application/json' --data '{
  "yearOfAction": 2012,
